Personal statement

I am a fourth-year Aerospace Engineering student at Middle East Technical University, excited about the chance to gain hands-on experience in the aviation field, with a drive to learn from experienced professionals. I am particularly interested in parts manufacturing where strong attention to detail and teamwork are essential. I am also looking forward to supporting day-to-day tasks, maintaining accurate records, and collaborating across departments. My goal is to build a solid foundation in the field and work toward a long-term career in the aviation industry.

Education

Middle East Technical University
Guzelyurt, Turkish Republic of Northern Cyprus

(2022 – expected 2026)

Bachelor of Science in Aerospace Engineering

Currently enrolled with a 75% merit-based scholarship

Honor Student, Fall 2024-2025

Key Skills gained:

- **Strong Analytical and Research Skills:** Enhanced problem-solving skills through hands-on assignments in aerospace engineering, supported by a solid foundation in mathematics. Conducted in-depth research on NACA airfoils for a technical report on a group project.
- **Technical Proficiency:** Attained proficiency with tools like AutoCAD, Inventor, MATLAB, XFLR5 and ANSYS Fluent useful for design, analysis and numerical calculations in aerospace.
- **Programming Skills:** Acquired proficiency in Python and C, enabling the creation of efficient algorithms and solutions for engineering problems.
- **Effective Communication:** Devised strong communication skills through group work and presentations, facilitating teamwork and idea-sharing.
- **Microsoft Office Skills:** Gained proficiency in Word, Excel, and PowerPoint for creating documentation, analyzing data, and crafting presentations.
- **Foundational Aerospace Knowledge:** Built a solid understanding of aircraft performance and engineering principles, with enthusiasm to apply this knowledge in real-world scenarios.

- **Hands-On Manufacturing Experience:** Practiced machining processes like drilling, turning and milling in a Manufacturing Technologies workshop, where I crafted a hammerhead.
- **CFD Experience:** Simulated 2D and 3D flows on the Computational Fluid Dynamics software, ANSYS Fluent.

Notable Modules- Computer Aided Engineering Drawing I, Thermodynamics, Fluid Mechanics, Aerodynamics, Heat Transfer, Mechanics of Materials, Flight Mechanics, Propulsion Systems

Pakistan International School Jeddah English Section

(2020 – 2022)

Jeddah, Saudi Arabia

A-levels:

- Chemistry – A
- Computer Science – A*
- Mathematics – A
- Physics – A*

Pakistan International School Jeddah English Section

(2018 – 2020)

Jeddah, Saudi Arabia

O-levels:

- | | |
|--|---------------------------------|
| • Biology – A* | • Islamiyat – A |
| • Chemistry – A* | • Mathematics – A* |
| • English as a Second Language – B | • Pakistan Studies – A |
| • Information and Communications Technology – A* | • Physics – A* |
| | • Urdu as a Second Language – A |

Languages

- **English:** Estimated B2 Level Proficiency (CEFR)
- **Urdu:** Native Proficiency

Hobbies & Interests

- **Continuous Learning:** Passionate about acquiring new skills, demonstrated by creating my personal website and exploring various web technologies.
- **Graphic Designing:** Recently started using Adobe Illustrator, a graphic design software, as a creative hobby to build foundational design skills.
